

Buffalo, July 9/94.

My dear Sir:

I enclose ripe seed pods
of *Lepidium virginicum* - and of
L. intermedium? The
flowers of the latter are nearly gone
& seem unopened - so that there
was a difficulty in distinguishing
it solely by its taste & smell
what growth. To make sure
I enclose pods of 3 different
plants - numbered 1, 2, 3.
You will bring me by letter
we know the results of your
examination; and, if you wish,
I'll collect a swad of *inter-*
medium? for you.

Trust truly yours,

G. W. Clinton
